

La Sosta di Sismano — Website Update Spec (Delta)

For Claude Code. This is a **delta spec** — a set of targeted changes to the **existing** La Sosta di Sismano website. Do **not** rebuild or restructure. Preserve the current design system, component patterns, routing, styling conventions, and file layout. Every change below should be the smallest possible edit that achieves the outcome.

Before you start

1. **Inspect the repo first.** Read the existing README, package.json, and top-level file structure. Identify:
 - The framework (Next.js / Astro / plain HTML / etc.)
 - Where content lives (MDX, JSON, i18n files, hardcoded JSX, etc.)
 - Existing styling approach (Tailwind, CSS modules, styled-components)
 - Whether an i18n library is already installed
 2. **Do not introduce new dependencies** unless absolutely required (see Task 0 for the one potential exception).
 3. **Match existing code style exactly** — indentation, quote style, component naming, import ordering.
 4. Before making changes, produce a **short plan** listing the files you intend to touch and what each change does. Wait for approval only if something is ambiguous; otherwise proceed.
-

Task 0 — Add EN / IT language toggle

Goal: Bilingual site with persistent language preference.

Approach (choose based on what's already in the repo):

- **If an i18n library is already present** (next-intl, react-i18next, next-i18next, astro-i18n, etc.): extend it. Add an `it` locale alongside the existing `en`, move existing English strings into the English locale file if they are currently hardcoded, and add Italian

translations from this spec.

- **If no i18n library is present and the site is small:** implement a lightweight context-based solution. Create a single `translations.ts` (or `.js`) file exporting an object keyed by locale, plus a `LanguageContext + useTranslation()` hook. Do **not** pull in a heavy i18n dependency for a brochure site.

Toggle UI:

- Place in the **top navigation bar, right-hand side**, adjacent to existing nav items
- Two flag buttons:  and  (use inline SVG or emoji — match whatever icon approach the existing nav uses)
- Active language visually distinguished (opacity, underline, or border — match existing active-state pattern in the nav)
- Clicking a flag updates the language and persists the choice
- Persistence: `localStorage.setItem('lang', 'en' | 'it')`
- On first visit: read `navigator.language`; if it starts with `it`, default to Italian; otherwise English
- No full-page reload — language switch should be instant

Accessibility: Each flag button needs an `aria-label` ("Switch to English" / "Passa all'italiano") and a visible focus ring.

Task 1 — Remove all Airbnb references

Find and remove:

- Any "Book on Airbnb" buttons or links
- Any `airbnb.co.uk` / `airbnb.com` URLs in CTAs, footers, or body copy
- Airbnb logos or badges
- Copy that says things like "View on Airbnb" or "Book via Airbnb"

Keep: Any legally required registration number display (`IT055033C2EY034430`).

Replacement: All former Airbnb CTAs route to the direct-contact section (Task 5).

Task 2 — Host information section

Check first: Is there already a host/about section on the site? If yes, **edit in place**. If no, add a new section on the home/landing page between the amenities section and the footer. Match the visual rhythm of adjacent sections (same container width, padding, heading scale).

Content:

Eironwy — Primary Host

Field	English	Italiano
Role	Host	Host
Since	Hosting since 2015 (11 years)	Ospita dal 2015 (11 anni)
Languages	Speaks English, Italian, and Spanish	Parla inglese, italiano e spagnolo
Response	Responds promptly	Risponde rapidamente

Bio (EN): Discovered Umbria at 17 and eventually made Sismano her adopted home. Passionate about walks, hiking, gardening, local festivals, and food. Loves the pastoral charm and warmth of the Umbrian people.

Bio (IT): Ha scoperto l'Umbria a 17 anni e ha finito per fare di Sismano la sua casa d'adozione. Appassionata di passeggiate, escursioni, giardinaggio, sagre paesane e buona cucina. Ama il fascino rurale e il calore della gente umbra.

Jan Holland — Co-host

(Name only, unless the existing section has a richer host-card pattern — in which case match it with a brief placeholder bio.)

Note: If the existing site previously listed "Claudia" as a co-host, remove her.

Task 3 — Add bathroom and bedroom 2 photos

Check first: Locate the existing photo gallery component and the asset directory (likely `/public/images/` or `/src/assets/`).

Actions:

1. **Bedroom 2** — Download from: <https://a0.muscache.com/im/pictures/miso/Hosting-5150036/original/8b3883bd-7eac-4978-925a-fa6d8c663b2a.jpeg> Save to the existing asset directory as `bedroom-2.jpg` (match existing filename conventions — kebab-case / snake_case / etc.).
2. **Bathroom** — Not available from automated scraping. Leave a `TODO` comment in the gallery data file: `// TODO: add bathroom.jpg - manually download from Airbnb gallery`. Add the gallery entry with a placeholder path so the entry is ready when the file arrives.

Add to gallery data/config with these captions:

Image	English caption	Italian caption
Bedroom 2	Bedroom that can be made into two singles or a king. Patio doors leading to terrace.	Camera da letto configurabile come due letti singoli o un letto matrimoniale king. Porte-finestre con accesso alla terrazza.
Bathroom	(add once image is available)	(add once image is available)

Ordering: Insert Bedroom 2 immediately after Bedroom 1 in the gallery. Insert Bathroom in a sensible position relative to other room photos (typically after bedrooms).

Task 4 — Day trips / nearby towns section

Check first: Is there an existing location or “nearby” section? If yes, **add the drive-times table/list to it**. If no, add a new section below the amenities section.

Headings:

- EN: `Day trips`
- IT: `Gite di un giorno`

Content (table or styled list — match existing patterns):

Destination	Drive time
Assisi	1 hr
Orvieto	1 hr
Spoletto	1 hr

Deruta	~45 min
Todi	nearby / vicino
Rome / Roma	day trip / gita di un giorno

Task 5 — Replace booking with direct contact

Goal: All booking CTAs now drive to direct owner contact.

Actions:

- Find the existing primary "Book" CTA button(s). Update:
 - EN label: `Book Your Stay`
 - IT label: `Prenota il tuo soggiorno`
 - Behaviour: scroll to (or route to) a contact section — do **not** link out to Airbnb
- Contact section** — edit existing, or add new if none exists:

Primary contact — Eironwy

- Phone: `+44 07962 141215` (link as `tel:+447962141215`)
- Email: `eironwyuk@gmail.com` (link as `mailto:`)

Alternate contact — Jan Holland

- Phone: `+39 345 046 6681` (link as `tel:+393450466681`)
- Email: `janholland33@gmail.com` (link as `mailto:`)

3. Italian labels:

- "Primary contact" → "Contatto principale"
 - "Alternate contact" → "Contatto alternativo"
 - "Phone" → "Telefono"
 - "Email" → "Email"
-

Task 6 — Amenities section

Placement: On the **existing home/landing page**, between the photo gallery and the location / day trips section. Do **not** create a separate amenities page.

Check first: Is there already a partial amenities or “features” section? If yes, replace its contents with the list below. If no, create a new section matching the layout rhythm of adjacent sections.

Layout: Airbnb-style icon grid. Show ~6–10 top amenities with icons; add a “Show all amenities” / “Mostra tutti i servizi” button that opens a modal or expands to reveal the full list grouped by category. If the site is small and no modal pattern exists, render the full grouped list inline instead of building a modal from scratch.

Icons: Use whatever icon set the site already uses (Lucide, Heroicons, custom SVGs). If none exists, use emoji sparingly or simple inline SVGs — do not add a new icon library.

Headings:

- EN: `What this place offers`
- IT: `Cosa offre questa casa`

Full amenities list:

Property / Proprietà

- Traditional Umbrian stone construction / Costruzione in pietra umbra tradizionale
- Exposed beams and cotto floors / Travi a vista e pavimenti in cotto
- Single level — fully accessible / Tutto su un piano, completamente accessibile
- Paved driveway with private parking / Vialetto pavimentato con parcheggio privato
- Private gardens, front & back, fully fenced / Giardini privati davanti e dietro, interamente recintati

Kitchen & Dining / Cucina e sala da pranzo

- Large, well-equipped kitchen / Cucina grande e ben attrezzata
- 5-burner gas hob / Piano cottura a gas a 5 fuochi
- Full-size oven / Forno grande
- Air fryer / Friggitrice ad aria
- Large fridge / Frigorifero grande
- Outdoor dining patio with mountain & field views / Patio esterno con vista su monti e

campagna

- Covered patio for breakfast, aperitivi, and dinner / Patio coperto per colazione, aperitivi e cena

Comfort & Connectivity / Comfort e connettività

- Wi-Fi throughout — 250 Mbps down / 150 Mbps up / Wi-Fi in tutta la casa — 250 Mbps download / 150 Mbps upload
- Dedicated workspace / Postazione di lavoro dedicata
- Washing machine / Lavatrice
- Drying racks / Stendibiancheria
- Window screens on all windows / Zanzariere a tutte le finestre
- Selection of books / Selezione di libri
- Carbon monoxide alarm / Rilevatore di monossido di carbonio
- Smoke alarm / Rilevatore di fumo

Views / Vista

- Garden views / Vista giardino
- Valley views / Vista valle
- Mountain views / Vista monti

Accessibility / Accessibilità

- Step-free access throughout / Accesso senza gradini in tutta la casa
- Guest entrance wider than 81 cm / Ingresso più largo di 81 cm
- Disabled parking spot / Posto auto per disabili
- Lit path to guest entrance / Percorso illuminato all'ingresso
- Bedroom entrances wider than 81 cm / Ingressi delle camere più larghi di 81 cm
- Step-free shower / Doccia senza gradini
- Fixed grab bars (toilet and shower) / Maniglioni fissi (WC e doccia)
- Shower/bath chair / Sedia per doccia

Nearby / Nei dintorni

- 5 restaurants within 5 km / 5 ristoranti entro 5 km
 - Walking distance to local caffè, bar, shop / A piedi dal caffè, bar, alimentari del paese
 - Easy access to Umbrian wineries (Montefalco & Orvieto) / Facile accesso alle cantine umbre (Montefalco e Orvieto)
 - Local festivals April–September / Sagre paesane da aprile a settembre
-

Task 7 — Reviews summary (optional)

Only implement if the existing site has a reviews/testimonials area already. If it does, update the numbers:

- **4.97 / 5** from **33 reviews**
- Add a “Guest favourite” badge if there’s a suitable place for it

Do not add a new reviews component from scratch.

Task 8 — Remove cleaning fee

If the existing site anywhere displays “€100 cleaning fee” / “final cleaning €100” / similar, **remove it**. It should no longer appear anywhere on the site.

House info (preserve / update)

If the existing site has a “Good to know” / “House rules” block, ensure it reflects:

Field	EN	IT
Registration	IT055033C2EY034430	IT055033C2EY034430
Check-in	14:00–18:00	14:00–18:00
Checkout	before 10:00	entro le 10:00
Maximum guests	4	4 ospiti massimo

Delivery checklist for Claude Code

Before marking done, verify:

- Zero Airbnb references remain (grep the codebase for `airbnb`)
 - Cleaning fee references removed (grep for `cleaning` , `€100` , `100 euro`)
 - Language toggle works: flags visible, click switches instantly, refresh preserves choice
 - Both EN and IT render correctly on every updated section — no untranslated strings visible in IT mode
 - All phone numbers are `tel:` links, all emails are `mailto:` links
 - Bedroom 2 image loads; bathroom has TODO placeholder
 - Amenities section sits on the home page between gallery and location sections
 - Only Jan is shown as co-host (Claudia removed)
 - No new top-level pages or routes created
 - No design-system-level changes (no new colour tokens, font changes, spacing rewrites)
 - No new npm dependencies added (unless i18n was genuinely needed and discussed)
-

Commit strategy

One commit per numbered task with conventional commit messages:

- `chore: remove Airbnb references`
- `feat(i18n): add EN/IT language toggle`
- `feat: add host information section`
- `feat: add bedroom 2 and bathroom photos`
- `feat: add day trips section`
- `feat: replace Airbnb CTA with direct contact`
- `feat: add amenities section`
- `chore: remove cleaning fee`

This makes review and rollback trivial.
